OSHITARI FILTERS

The original OMF Oshitari filters, made 100% in Japan, with exceptional filtering properties.

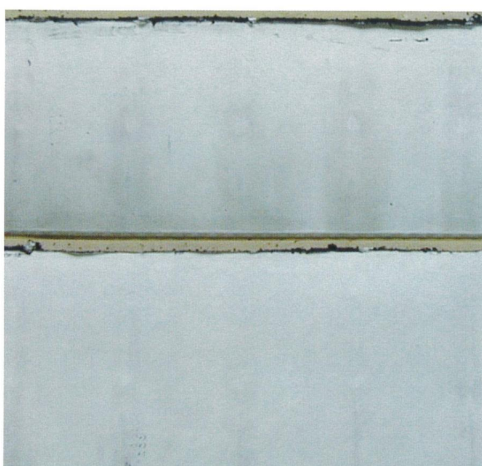

Benefits:

- High grade of filtration and long life
- Keeps the water very clean and minimizes secondary discharge phenomena, thus improving the surface finish of the workpiece
- Extends the life of resins

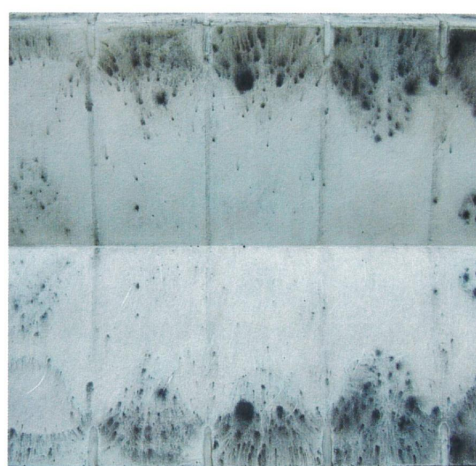

Comparison between OMF and other products

OMF

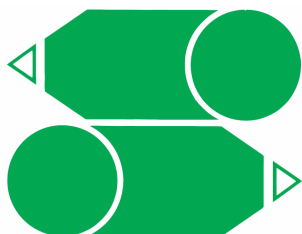

OMF SUPER FILTER OFFERS a high filtration performance so that the chips hardly pass through to the downstream of filter.

Other products

Other products let numerous chips pass through to the downstream.
