nanoBRASS manufacturing facility highlights:

Key points:

- 176 drawing machines in 2 plants
- Total production capacity: 2700 tons/month
- 100% in-house production
- Virgin raw materials
- Strict quality control of alloys before & after casting
- Electrical plating process using unique equipment
- Fine wire drawing with best quality diamond dies
- In-house periodic die polishing (drawing dies maintenance to ensure wire surface quality & perfect diameter tolerance)
- Strict quality control of final wire (spider 9 test)
- Complete traceability for the single spool
